Dear Residents,

We're writing to let you know about upcoming work on the York Central project. From **Tuesday 9 May** we will be working in the area of the yellow star in the picture below. Work in this area has been ongoing since January 2023 and will increase from 9 May for approximately two weeks.

What does this involve?

This area will form part of the extension to Leeman Road linking the new spine road to the existing Leeman Road. We will be installing large flood attenuation tanks to help ensure that the new road and the surrounding drain properly.

To prepare the area, Sisk will install sheet piles to support the flood attenuation tanks. Noise in the area may increase during these works. We will carry out continual noise monitoring to ensure that we stay within approved limits. We will prepare the ground before installing the sheets, to reduce noise and vibration in the area.

We will be working in for approximately two weeks. Our work hours are 8am – 6pm Monday to Friday, with no weekend or evening work planned for this phase of activity.

We'll have regular project updates on the York Central website. You can also register for project emails by visiting www.yorkcentral.info/contact/. If you have any enquiries about work in your area or questions about the scheme, please contact us at the email address below, or write to the address at the top of this letter.

Kind regards,

Amy Hoskin
